BOOKS AUTHORED / EDITED	RESEARCH PAPERS	CITATIONS	H-INDEX (GOOGLE SCHOLAR)

01 About the Keynote

The recent appearance and rapid growth of GenAI technologies, chatbots and agents have influenced almost every sphere of life and society. These technologies have brought a paradigm shift in the ways people access and use information and data which have implications for the education, research and practice in the discipline of Information Science.

In his keynote, Professor Chowdhury will address the benefits as well challenges associated with the use of GenAI tools and technologies in education, research and practice in the context of digital libraries and information services. He will propose a research agenda that can address the social, economic and environmental sustainability issues and challenges associated with the applications and use of GenAI technologies in digital libraries and information services.

RECENT BOOK

AI and Information Access: Benefits, Challenges and Lessons

02 Brief CV

Gobinda Chowdhury (PhD, FCLIP, SFHEA) is a Professor of Information Science in the Department of Computer & Information Sciences, University of Strathclyde, Glasgow, UK. He is a world leading researcher in digital libraries and sustainable information services. He has authored/edited 18 books, and over 200 research papers with nearly 32,000 citations and an h-index of 42 (Google Scholar).

His recent book ***AI and Information Access: Benefits, Challenges and Lessons*** addresses some key issues and challenges around Generative AI and information access. Professor Chowdhury has served as the European and global chair of the **iSchools**. He has been actively involved in various editorial and scholarly activities. He has chaired and delivered keynote/invited talks at several international conferences and events. He has managed several research projects, and supervised and examined many PhD students in different countries.
